

Memo to: Dan Smith, Mike Winters

From: Wayne Koska

Subject: Position of Collar Gage Packs for DCA322

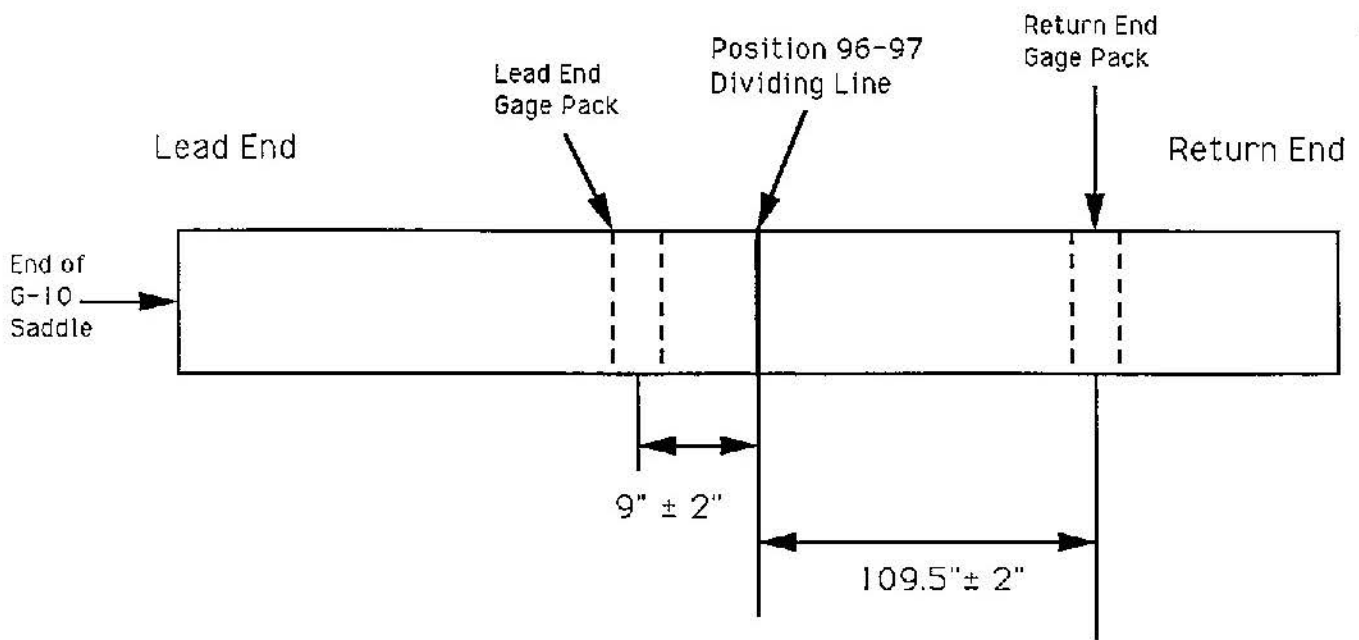

The Collar Gage Packs for DCA322 should be centered -9 ± 2 and $+109.5 \pm 2$ inches from the dividing line of positions 96 and 97 (see figure 1).

These two positions correspond to a minimum and maximum of the summed azimuthal size of the two inner coils. The minimum azimuthal size of (10.6, 12.3 mils) is at positions 93 and 94. The maximum azimuthal size of 26.6 mils is at position 133 (see figure 2).

These data have been taken with the automatic coil sizing apparatus.
