

## ACKNOWLEDGMENT

The Editor would like to take the opportunity to express his deep appreciation to the speakers, their scientific secretaries and the non-scientific support staff for their excellent cooperation and common effort that succeeded in the rapid publication of these Proceedings.

Along with the gratitude of the Organizing Committee the Editor would like to extend a special vote of thanks to the technical and secretarial personnel of the Physikalisches Institut der Universität Bonn, who have worked so well together to make the Symposium a success and to bring it to an end with the publication of this volume.

Particular thanks go to Mrs. E. Wendorf for her excellent computer work which considerably eased the organizational burdens, including the preparation of several lists for these Proceedings. I am especially grateful to the ladies E. Danne, E. Duell, D. Faßbender, E. Haseley, M. Hölzmann, M. Joseph and M. Künkel for their exceptional support and diligence in preparing shares of the text and figures and in correcting typographical errors.

Finally I would like to express my great appreciation to Mrs. M. Jastrow-Sauerwein for her superb work that was done with the design of the book.

W. Pfeil  
Proceedings Editor
