

CROSS REFERENCES FOR HADRON-HADRON COLLIDERS

The following papers also contain information on this subject:

	Page
Heavy Higgs Production and Detection H. A. Gordon, W. Marciano, F. E. Paige, P. Grannis, S. Naculich, and H. H. Williams.....	161
Standard Model Group, QCD Subgroup--Dynamics Isolating and Testing the Elementary QCD Subprocesses M. J. Tannenbaum.....	184
Relativistic Heavy Ion Collisions T. D. Lee.....	202
Relativistic Heavy Ion Collisions and Particle Physics K. Gottfried and J. D. Jackson.....	207
"Conventional" 20-TeV, 10-Tesla, p^+p Colliders R. Diebold, C. Ankenbrandt, T. Collins, E. Fisk, D. Johnson, P. Mantsch J. Peoples, R. Shafer, L. Teng, G. Lambertson, C. Leemann, L. Smith C. Taylor, and L. Jones.....	307
20-TeV Colliding Beam Facilities: New, Low-Cost Approaches R. Huson, C. Ankenbrandt, D. Berley, H. Bingham, D. Cline, E. Courant E. Knapp, H. Lubatti, R. Lundy, P. Mantsch, M. Month, R. Palmer L. Ratner, C. Taylor, L. Teng, W. Wenzel, and R. Wilson.....	315
Fermilab Site-Fillers as CAMEL Prototypes C. M. Ankenbrandt.....	336
Reasons Experiments Can Be Performed at a pp Machine at $L = 10^{33} \text{cm}^{-2} \text{sec}^{-1}$ H. A. Gordon, T. Ludlam, E. Platner, and M. J. Tannenbaum.....	357
A Primer on Detectors in High Luminosity Environment R. Huson, L. M. Lederman, and R. Schwitters.....	361
High Luminosity Considerations E. D. Platner.....	369
