## CONTENTS

### Low Energy Weak Interactions and Neutrinos

Rare decays and $CP$ violation in $K$ and $B$ systems .....	1
C. S. Lim	
Estimations of long-distance effects on $K^0-\bar{K}^0$ mixing by chiral Lagrangian	13
T. Kurimoto	
$CP$ violation in $B$ meson decays in 3- and 4-generation models .....	21
S. Wakaizumi	
Quark mass matrix and $B_d^0-\bar{B}_d^0$ mixing .....	28
M. Tanimoto	
Neutrino mass matrix and double beta decay .....	38
T. Kotani	
Coherence condition for resonant neutrino oscillation .....	60
H. Anada and H. Nishimura	

### $W$ , $Z$ , and Higgs

Verification of the quantum electroweak effects through the weak boson mass relation .....	64
Z. Hioki	
The equivalent photon approximation vs. exact calculation for the single weak boson production in $e^+e^-$ collision .....	71
H. Iwasaki	
Production and decay of superheavy quarkonia in multi-TeV colliders .....	77
H. Inazawa, T. Morii, and J. Morishita	
Higgs physics .....	83
K. Hikasa	

Signal and background of standard Higgs particle .....	107
O. Terazawa and M. Biyajima	
Higgs boson production in $\gamma\text{-}\gamma$ collision in TeV region .....	112
R. Najima	
<b>Supersymmetry</b>	
SUSY search at HERA .....	123
T. Kon, T. Kobayashi, and K. Nakamura	
Single $W$ production associated with SUSY particles in longitudinally polarized $e^+e^-$ collisions .....	129
M. Jimbo	
$CP$ -violation in SUSY and $T$ -odd asymmetry .....	136
Y. Kizukuri	
Flipped left-right gauge model with $\tau$ -gaugino mixing .....	140
K. Yamamoto	
Superstring phenomenology .....	144
T. Matsuoka	
Search for realistic orbifold models .....	157
Y. Ono	
<b>Composite Models</b>	
Color-sextet condensation .....	162
K. Fukazawa, T. Muta, J. Saito, I. Watanabe, M. Yonezawa, and M. Inoue	
Calculating the decay constants in dynamical symmetry breaking .....	173
K.-I. Aoki	
Recent topics on technicolor theory .....	187
M. Bando	

Extra composite $W$ and $Z$ bosons implied by complementarity .....	195
M. Yasuè	
Effects of exotic composite particles in the TRISTAN, SLC, and LEP energy region .....	203
K. Akama	
New physics at TeV scale II .....	213
H. Terazawa	
 <b>Experimental results and prospects</b>	
Rare kaon decays .....	227
T. Shinkawa	
Recent results from AMY at TRISTAN .....	240
Y. Sakai	
Recent results and future prospects of TOPAZ experiment .....	253
I. Adachi	
Recent results from VENUS .....	267
M. Daigo	
Present status of LEP .....	279
H. Takeda	
Double beta decays of $^{100}\text{Mo}$ and double weak decays with $\Delta S = -2$ .....	285
H. Ejiri	
Present status and future of Kamiokande .....	297
K. Nakamura	
Dark matter search by scintillating fiber gamma ray satellite .....	313
R. Enomoto	
$B$ physics with an asymmetric collider at KEK .....	318
K. Abe	

Present status and physics prospects of SSC .....	332
S. Sugimoto	
Detection of heavy particles—quarks and Higgs .....	355
Y. Asano	
 <b>Appendix: Copy of transparencies</b>	
SUSY search at supercolliders .....	370
K. Hidaka	
Purely stringy model building with lower-rank gauge groups .....	386
H. Sato	
Present status of neutrino oscillation experiments .....	395
A. Suzuki	
Recent results from CDF .....	416
K. Yasuoka	
Status of the ZEUS detector .....	438
R. Hamatsu	
 <b>Program</b> .....	 444
 <b>List of Participants</b> .....	 447
