

Memo to: Dan Smith, Mike Winters

From: Wayne Koska

Subject: Position of Collar Gage Packs for DCA320

The Collar Gage Packs for DCA320 should be centered -9 ± 2 and -78 ± 2 inches from the dividing line of positions 96 and 97 (see figure 1).

These two positions correspond to a minimum and maximum of the summed azimuthal size of the two inner coils. The minimum azimuthal size of (15.2, 14.9 mils) is at positions 93 and 94. The maximum azimuthal size (28.2, 30.8 mils) is at positions 70 and 71 (see figure 2).

These data have been taken with the automatic coil sizing robot. To compare with summed coil size data from magnets DCA310-DCA318, add 12 mils (3 mils x 4 quadrants).
